

Our Story

At FURCIL, we believe that better pet health doesn't have to begin with a complete change in diet.

For many Indian pet parents, switching foods can be expensive, inconvenient, or simply not practical. Yet, they still want to give their pets better nutrition, healthier digestion, stronger immunity and a happier life.

We started FURCIL with a simple belief: improving a pet's well-being should fit into everyday life and not disrupt it.

That's why we create thoughtfully formulated nutritional toppers and everyday wellness products that work alongside your pet's existing routine. Instead of asking you to replace everything, we help you build on what you're already doing.

Every FURCIL product is developed with one purpose—to make better pet care simpler, more practical and more accessible for Indian pet parents.

Because healthier pets don't always need a new diet.

Sometimes, they just need something better added to it.
